

Year Group Expectations: Year 1

Year 2	- Use simple scientific language from the year 2 PoS to talk about / record what they have noticed - Use observations to make suggestions and/or ask questions Observe and describe simple processes/cycles/changes with several steps (e.g. growth cycle, simple food chain, saying how living things depend on one another) Observe closely and communicate with increasing accuracy the features or properties of things in the real world	Name / Identify common examples, some common features or different uses Sort and group objects, materials or living things by observable and/or behavioural features Compare and contrast... a variety of things [objects, materials or living things] - focusing on the similarities as well as the differences	Raise their own logical questions based on or linked to things they have observed - With help / scaffolds, begin to ask questions such as 'What will happen if...?'	- Talk about how useful the information source was and express opinion about findings - Make suggestions about who to ask or where to look for information. - Ask people questions to help them answer their questions Use simple and appropriate secondary sources (such as books, photographs, videos and other technology) to find things out / find answers	- Act out something to represent something else about the world around us (e.g. a life cycle) - Share ideas in a group and listen to the ideas of others - Work cooperatively with others on a science task making some choices	
Year 1	Begin to use simple scientific language (from yr1 PoS) to talk about or record what they have noticed - Use observations to make suggestions and/or ask questions Look / observe closely and communicate changes over time Look / observe closely and communicate the features or properties of things in the real world Observe closely using their senses	Name/identify common examples and some common features - With help, decide how to sort and group objects, materials or living things Name basic features of objects, materials and living things - Say how things are similar or different Compare and contrast simple observable features / characteristics of objects, materials and living things	Ask simple questions about what they notice about the world around them Demonstrate curiosity by the questions they ask	- Ask people questions (e.g. an expert or hot-seating) Use simple primary and secondary sources (such as objects, books and photographs) to find things out	- With help, follow movements (dance / drama) to act out their Science - Share ideas in a group and listen to the ideas of others - Work with others on a science task	
Transition	Talk about and draw pictures of what they have seen	- Find things that are similar or different - Sort / match things in their own way (objects/living things/events) - Use simple equipment to sort things into - Use senses to help sort things	- Ask a question - Show that they are curious	- Talk to people about what they do - Talk to people about how things work	- With help, follow movements to act out the Science they are learning about - Work with others on a science task	
	EXPLORING / OBSERVING KS1 - observing closely Using their observations and ideas to suggest answers to questions	GROUPING AND CLASSIFYING KS1 - Compare and contrast a variety of examples linked to KS1 PoS	QUESTIONING KS1 - asking simple questions	RESEARCH KS1 - finding things out using secondary sources of information	MODELLING using dance, drama or a visual aid to represent science in the real world	COLLABORATING interacting effectively as part of a group

Year Group Expectations: Year 1

Year 2	- Carry out simple comparative tests as part of a group, following a method with some independence - Make a simple prediction about what might happen and try to give a vague reason (even though it might not be correct) - With support, make suggestions on a method for setting up a simple comparative test - Talk about a practical way to find answers to their questions	Measure using non-standard and simple standard measures (e.g. cm, time) with increasing accuracy - Begin to make decisions about which equipment to use - Correctly and safely use equipment provided to make observations and/or take simple measurements	Record and communicate their findings in a range of ways to a variety of audiences - Use simple scientific language with increasing accuracy (from year 2 PoS) Record simple data with some accuracy to help in answering questions: - With support or using frameworks, make decisions about how to complete a variety of tables/charts (e.g. a 2 column table, tally charts, Venn diagram, pictograms, block graphs with 1:1 scale). - Present findings in a class displays - Sequence / annotate photographs of change over time - Produced increasingly detailed drawings which are labelled/annotated	- With guidance, begin to notice patterns in their data e.g. order their findings, sequence best to worst, say what happened over time, etc. - Recognise if results matched predictions. (say if results were what they expected) - Use their recordings to talk about and describe what has happened	- Begin to use simple scientific language (from year 2 PoS) to explain what they have found out. - Give a simple, logical reason why something happened (e.g. I think ... because ...)	Begin to discuss if the test was unfair
Year 1	- With help, carry out a simple test/comparative test - With help, make a simple prediction or suggestion about what might happen - Begin to suggest some ideas e.g. choose which equipment to use, choose which materials to test from a selection Talk about ways of setting up a test	Measure using non-standard units e.g. how many lolly sticks/cubes/handfuls, etc. Observe closely, using simple equipment (e.g. hand lenses, egg timers) - use senses to compare different textures, sounds and smells	- Communicate their ideas to a range of audiences in a variety of ways - Complete a pre-constructed table / chart using picture records or simple words - Contribute to a class display - Add annotations to drawings or photographs - Begin to use some simple scientific language from yr1 PoS Record simple visual representations of observations made	- Use recordings to talk about and describe what happened - Sequence photographs of an event/observation	Begin to use simple scientific language (from yr1 PoS) to talk about what they have found out or why something happened	N/A in Y1
Transition	- Come up with new things to try/test - Demonstrate some resilience and try different ideas - Talk about things they are testing	Use senses and simple equipment to make observations	- Begin to record observations as... - Drawings (talk about them / annotated by an adult) - Photographs (talk about them / annotated by an adult)	With prompts, say what they have seen / what has happened	N/A at this level	N/A at this level
	PLANNING AND TESTING KS1 - performing simple tests	USING EQUIPMENT AND MEASURES KS1 - Using simple equipment and gathering data to help in answering their questions	COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp	CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION		
				DESCRIBING RESULTS / LOOKING FOR PATTERNS KS1 - Talk about what happened / what they noticed	EXPLAINING RESULTS KS1 - talk about what they found out	TRUSTING RESULTS KS1 – beginning to spot when a method is not fair

Year Group Expectations: Year 2

Year 3	- Observe and record relationships <u>between structure and function</u> (linked to Y3 PoS) - Observe and record changes /stages over time (linked to Y3 PoS) - Explore / observe things in the local environment / real contexts and record observations (linked to Y3 PoS) – see ‘Communicating’ section also re links to vocabulary	<u>Decide ways and give reasons for sorting, grouping, classifying, identifying</u> things/objects, living things, processes or events based on specific characteristics <u>Compare and contrast and begin to consider the relationships between different things</u> (e.g. <i>structures of plants, functions of plant parts, diets, skeletons of humans and other animals, changes over time, etc.</i>) - Record similarities as well as differences (e.g. <i>what do all skeletons have? as well as the differences between skeletons</i>)	- Explore their own ideas about ‘what if....?’ scenarios e.g. humans did not have skeletons. - Ask questions such as ‘What if we tried....?’ or ‘What if we changed...?’ <u>Begin to understand that some questions can be tested in the classroom and some cannot.</u> - Within a group suggest questions that can be explored, observed, tested or investigated further <u>Within a group suggest relevant questions</u> about what they observe and about the world around them.	<u>Find things out using a range of secondary sources of information</u> (e.g. <i>books, photographs, videos and other technology</i>)	Act out or make a model of something to represent something in the real world using appropriate scientific vocabulary verbally.	- Begin to make some decisions about an idea within a group from a list of choices (e.g. <i>let’s put them all in a pile first OR I think we should try</i>) - With help; support, listen to and acknowledge others in the group (e.g. <i>Yes. I prefer that one too</i>) - Build on / add to someone else’s idea. (e.g. <i>we could use x and as well as y</i>) - Begin to understand that it is okay to disagree with their peers and offer a reason for their opinion
Year 2	- Use simple scientific language from the year 2 PoS to talk about / record what they have noticed - Use observations to make suggestions and/or ask questions Observe and describe simple processes/cycles/changes with several steps (e.g. <i>growth cycle, simple food chain, saying how living things depend on one another</i>) Observe closely and communicate with increasing accuracy the features or properties of things in the real world	Name / Identify common examples, some common features or different uses Sort and group objects, materials or living things by <u>observable and/or behavioural features</u> Compare and contrast... a variety of things [objects, materials or living things] - focusing on the similarities as well as the differences	<u>Raise their own logical questions based on or linked to things they have observed</u> - With help / scaffolds, begin to ask questions such as ‘What will happen if...?’	- Talk about how useful the information source was and express opinion about findings - Make suggestions about who to ask or where to look for information. - Ask people questions to help them answer their questions <u>Use simple and appropriate secondary sources (such as books, photographs, videos and other technology) to find things out / find answers</u>	Act out something to represent something else about the world around us (e.g. <i>a life cycle</i>)	- Share ideas in a group and listen to the ideas of others - Work cooperatively with others on a science task making some choices
Year 1	<u>Begin to use simple scientific language (from yr1 PoS) to talk about or record what they have noticed</u> - Use observations to make suggestions and/or ask questions <u>Look / observe closely and communicate changes over time</u> <u>Look / observe closely and communicate the features or properties of things in the real world</u> <u>Observe</u> closely using their senses	Name/identify common examples and some common features - With help, decide how to sort and group objects, materials or living things Name <u>basic features</u> of objects, materials and living things - Say how things are similar or different Compare and contrast simple <u>observable features / characteristics</u> of objects, materials and living things	<u>Ask simple questions about what they notice about the world around them</u> <u>Demonstrate curiosity by the questions they ask</u>	- Ask people questions (e.g. an expert or hot-seating) - Use simple <u>primary and secondary sources</u> (such as objects, books and photographs) to find things out	With help, follow movements (dance / drama) to act out their Science	- Share ideas in a group and listen to the ideas of others - Work with others on a science task
	EXPLORING / OBSERVING KS1 - observing closely Using their observations and ideas to suggest answers to questions LKS2 - developing their own ideas and their understanding of the world around them	GROUPING AND CLASSIFYING KS1 - Compare and contrast a variety of examples linked to KS1 PoS LKS2 - Compare and contrast a variety of examples linked to LKS2 PoS	QUESTIONING KS1 - asking simple questions LKS2 - asking relevant questions	RESEARCH KS1 - finding things out using secondary sources of information LKS2 - finding things out using a wide range of secondary sources of information	MODELLING using dance, drama or a visual aid to represent science in the real world	COLLABORATING interacting effectively as part of a group

Year Group Expectations: Year 2

Year 3	- Help to <u>decide about how to set up a simple fair test</u> and begin to recognise when a test is not fair. - Make a prediction based on everyday experience - With support/as a group, set up simple practical enquiries incl. comparative and fair tests e.g. <u>make a choice</u> from a list of a things (variables) to change when conducting a fair test. (e.g. <i>choose which magnets to compare and which method to use to test their strength</i>). - As a group, begin to make some decisions about the best way of answering their qus. - Find/suggest a practical way to compare things e.g. <i>rocks, magnets</i>	- Collect data from their own observations and measurements using notes/ simple tables/standard units - Help to make some decisions about what observations to make, how long to make them for, the type of simple equipment that might be used and how to work safely. - Make simple accurate measurements using whole number standard units, using a range of equipment - Gather data in a variety of ways to help in answering questions - Use equipment accurately to improve the detail of their measurements/observations (e.g. <i>microscopes, measuring syringes, measuring cylinders, hand lenses</i>)	- Record and present findings using simple scientific language and vocabulary from the year 3 PoS, including <i>discussions, oral and written explanations, notes, annotated drawings, pictorial representations, labelled diagrams, simple tables, bar charts (using scales chosen for them), displays or presentations</i> - With scaffold / support record, and present data in a variety of ways to help in answering questions. - Communicate their findings in ways that are appropriate for different audiences. (linked to Y3 PoS)	- With scaffold/support, describe and compare the effect of different factors on something. (e.g. <i>we noticed that larger magnets are not always stronger</i>) - With help, look for changes and simple patterns in their observations, data, chart or graph. - Use their results to consider whether they met their predictions.	- Use their experience and some evidence or results to <u>draw a simple conclusion to answer their original question</u>. - Write a simple explanation of why things happened (using the word 'because') and <u>using simple scientific language and vocabulary from the year 3 PoS</u>	- Say whether what happened was what they expected and notice any results that seem odd. <u>Begin to recognise when a test is not fair and suggest improvements.</u>
Year 2	- Carry out simple comparative tests as part of a group, following a method with some independence - Make a simple prediction about what might happen and try to give a vague reason (even though it might not be correct) - With support, make suggestions on a method for setting up a simple comparative test - Talk about a practical way to find answers to their questions	Measure using non-standard and simple standard measures (e.g. cm, time) with increasing accuracy - Begin to make decisions about which equipment to use - Correctly and safely use equipment provided to make observations and/or take simple measurements	Record and communicate their findings in a range of ways to a variety of audiences - Use simple scientific language with increasing accuracy (from year 2 PoS) Record simple data with some accuracy to help in answering questions: - With support or using frameworks, make decisions about how to complete a variety of tables/charts (e.g. <i>a 2 column table, tally charts, Venn diagram, pictograms, block graphs with 1:1 scale</i>). - Present findings in a class displays - Sequence / annotate photographs of change over time - Produced increasingly detailed drawings which are labelled/annotated	- With guidance, begin to notice patterns in their data e.g. order their findings, sequence best to worst, say what happened over time, etc. - Recognise if results matched predictions. (say if results were what they expected) - Use their recordings to talk about and describe what has happened	- Begin to use simple scientific language (from year 2 PoS) to explain what they have found out. - Give a simple, logical reason why something happened (e.g. <i>I think ... because ...</i>)	Begin to discuss if the test was unfair
Year 1	- With help, <u>carry out</u> a simple test/comparative test - With help, make a simple prediction or suggestion about what might happen - Begin to suggest some ideas e.g. choose which equipment to use, choose which materials to test from a selection Talk about ways of setting up a test	Measure using non-standard units e.g. <u>how many lolly sticks/cubes/handfuls, etc.</u> <u>Observe closely, using simple equipment</u> (e.g. hand lenses, egg timers) - use senses to compare different textures, sounds and smells	- Communicate their ideas to a range of audiences in a variety of ways - Complete a pre-constructed table / chart using picture records or simple words - Contribute to a class display - Add <u>annotations to drawings or photographs</u> - Begin to use some simple scientific language from yr1 PoS Record simple visual representations of observations made	- Use recordings to talk about and describe what happened - Sequence photographs of an event/observation	Begin to use simple scientific language (from yr1 PoS) to talk about what they have found out or why something happened	N/A in Y1
	PLANNING AND TESTIING KS1 - performing simple tests LKS2 - making decisions about and setting up simple practical enquiries, comparative tests and fair tests	USING EQUIPMENT AND MEASURES KS1 - Using simple equipment and gathering data to help in answering their questions LKS2 - making accurate measurements and gathering data	COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp	CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION		
				DESCRIBING RESULTS / LOOKING FOR PATTERNS KS1 - Talk about what happened / what they noticed LKS2 - Describing their findings / results	EXPLAINING RESULTS KS1 - talk about what they found out LKS2 - reporting on findings saying why something happened	TRUSTING RESULTS KS1 – beginning to spot when a method is not fair LKS2 - suggest improvements for further tests

Year Group Expectations: Year 3

Year 4	- Suggest their own ideas on a concept and compare these with what they observe / find out. - Use observations to suggest what to do next <u>Discuss ideas and develop descriptions from their observations using relevant scientific language and vocabulary</u> (from Y4 PoS) <u>Observe and record relationships between structure and function or between different parts of a processes</u> (linked to Y4 PoS) <u>Observe and record changes /stages over time</u> (linked to Y4 PoS)	<u>Make a simple guide to local living things.</u> <u>Use guides or simple keys to classify / identify [animals, flowering plants and non-flowering plants].</u> - Use their observations to identify and classify <u>Begin to give reasons for these similarities and differences.</u> - Record similarities as well as differences and/or changes related to simple scientific ideas or processes or more complex groups of objects/living things/events (e.g. <i>evaporation and condensation, different food chains, different electrical circuits</i>)	<u>Ask/raise their own relevant questions with increasing confidence and independence that can be explored, observed, tested or investigated further</u> - Ask questions such as 'What will happen if...?' or 'What if we changed...?' (linked with Y4 PoS) <u>Choose/select a relevant question that can be answered [by research or experiment / test].</u>	<u>Make decisions about which information to use from a wide range of sources and make decisions about how to present their research</u> - Recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations.	- Make a visual representation or a model of something to represent something they have seen or a process that is difficult to see. - Suggest their own ideas on a concept and compare these with models or images.	- Make some decisions about an idea within a group (e.g. <i>I think we should find out by testing...</i>) - Increasingly support, listen to and acknowledge others in the group - Build on / add to someone else's idea to improve a plan. - Understand that it is okay to disagree with their peers and offer reasons for their opinion
Year 3	<u>Observe and record relationships between structure and function</u> (linked to Y3 PoS) - Observe and record changes /stages over time (linked to Y3 PoS) - Explore / observe things in the local environment / real contexts and record observations (linked to Y3 PoS) – see 'Communicating' section also re links to vocabulary	<u>Decide ways and give reasons for sorting, grouping, classifying, identifying things/objects, living things, processes or events based on specific characteristics</u> <u>Compare and contrast and begin to consider the relationships between different things</u> (e.g. <i>structures of plants, functions of plant parts, diets, skeletons of humans and other animals, changes over time, etc.</i>) - Record similarities as well as differences (e.g. <i>what do all skeletons have? as well as the differences between skeletons</i>)	- Explore their own ideas about 'what if...?' scenarios e.g. humans did not have skeletons. - Ask questions such as 'What if we tried....?' or 'What if we changed...?' <u>Begin to understand that some questions can be tested in the classroom and some cannot.</u> - Within a group suggest questions that can be explored, observed, tested or investigated further <u>Within a group suggest relevant questions about what they observe and about the world around them.</u>	<u>Find things out using a range of secondary sources of information</u> (e.g. <i>books, photographs, videos and other technology</i>)	Act out or make a model of something to represent something in the real world using appropriate scientific vocabulary verbally.	- Begin to make some decisions about an idea within a group from a list of choices (e.g. let's put them all in a pile first OR I think we should try) - With help; support, listen to and acknowledge others in the group (e.g. <i>Yes. I prefer that one too</i>) - Build on / add to someone else's idea. (e.g. <i>we could use x and as well as y</i>) - Begin to understand that it is okay to disagree with their peers and offer a reason for their opinion
Year 2	<u>Use simple scientific language from the year 2 PoS to talk about / record what they have noticed</u> - Use observations to make suggestions and/or ask questions <u>Observe and describe simple processes/cycles/changes with several steps</u> (e.g. <i>growth cycle, simple food chain, saying how living things depend on one another</i>) <u>Observe closely and communicate with increasing accuracy the features or properties of things in the real world</u>	Name / Identify common examples, some common features or different uses Sort and group objects, materials or living things by observable and/or behavioural features Compare and contrast... a variety of things [objects, materials or living things] - focusing on the similarities as well as the differences	<u>Raise their own logical questions based on or linked to things they have observed</u> - With help / scaffolds, begin to ask questions such as 'What will happen if...?'	- Talk about how useful the information source was and express opinion about findings - Make suggestions about who to ask or where to look for information. - Ask people questions to help them answer their questions <u>Use simple and appropriate secondary sources (such as books, photographs, videos and other technology) to find things out / find answers</u>	Act out something to represent something else about the world around us (e.g. <i>a life cycle</i>)	- Share ideas in a group and listen to the ideas of others - Work cooperatively with others on a science task making some choices
	EXPLORING / OBSERVING KS1 - observing closely Using their observations and ideas to suggest answers to questions LKS2 - developing their own ideas & their understanding of the world around them	GROUPING AND CLASSIFYING KS1 - Compare and contrast a variety of examples linked to KS1 PoS LKS2 - Compare and contrast a variety of examples linked to LKS2 PoS	QUESTIONING KS1 - asking simple questions LKS2 - asking relevant questions	RESEARCH KS1 - finding things out using secondary sources of information LKS2 - finding things out using a wide range of secondary sources of information	MODELLING using dance, drama or a visual aid to represent science in the real world	COLLABORATING interacting effectively as part of a group

Year Group Expectations: Year 3

Year 4	▪ Carry out simple fair tests with increasing confidence investigating the effect of something on something else (linked to Y4 PoS). ▪ Start to make their own decisions about the most appropriate type of science enquiry they might use to answer scientific questions (<i>is a fair test the best way to investigate their question?</i>). ▪ Make a prediction based on the knowledge acquired from previous explorations / observations and apply it to a new situation ▪ Explain their planning decisions and choices ▪ Make some of the planning decisions about what to change and measure/observe. ▪ Begin to recognise when a fair test is necessary.	▪ Begin to identify where patterns might be found and use this to <u>begin to identify what data to collect</u> ▪ <u>Make more of the decisions</u> about what observations to make, how long to make them for and the type of equipment that might be used. ▪ Recognise obvious risks and how to keep themselves and others safe ▪ Learn how to use new equipment, such as <u>data loggers & measure temperature in degrees Celsius (°C) using a thermometer.</u> ▪ <u>Collect data from their own observations and measurements, using notes/simple tables/standard units</u> ▪ Make accurate measurements using <u>standard units</u> [and more complex units and parts of units] using a range of equipment and scales	▪ <u>Record findings using relevant scientific language and vocabulary (from Y4 PoS),</u> including discussions, oral and written explanations, notes, drawings (annotated), pictorial representations, labelled diagrams, tables and bar charts [where intervals and ranges agreed through discussion], displays or presentations ▪ <u>Begin to select the most useful ways to collect, record, classify and present data from a range of choices</u> ▪ Make decisions on how best to communicate their findings in ways that are appropriate for different audiences	▪ <u>Notice/find patterns in their observations and data. (Describe the effect of something on something else)</u> (e.g. <i>as I lengthen the ruler I notice that the pitch gets lower</i>) ▪ With some independence, analyse results / observations by writing a sentence that matches the evidence ▪ i.e. deciding the important aspect of the result and summarising in a conclusion (e.g. <i>metals tend to be good conductors of electricity</i>)	▪ Begin to develop their ideas about relationships and interactions between things and explain them ▪ <u>Use relevant scientific language and vocabulary (from Y4 PoS) to begin to say/explain why something happened</u>	▪ <u>Use results to suggest improvements, new questions and/or predictions for setting up further tests</u> ▪ Compare their results with others and give reasons why results might be different
Year 3	▪ Help to decide about how to set up a simple fair test and begin to recognise when a test is not fair. ▪ Make a prediction based on everyday experience ▪ With support/as a group, set up simple practical enquiries incl. comparative and fair tests e.g. <u>make a choice</u> from a list of a things (variables) to change when conducting a fair test. (e.g. <i>choose which magnets to compare and which method to use to test their strength</i>). ▪ As a group, begin to make some decisions about the best way of answering their qus. ▪ Find/suggest a practical way to compare things e.g. <i>rocks, magnets</i>	▪ <u>Collect data from their own observations and measurements using notes/ simple tables/standard units</u> ▪ Help to make some decisions about what observations to make, how long to make them for, the type of simple equipment that might be used and how to work safely. ▪ <u>Make simple accurate</u> measurements using whole number standard units, using a range of equipment ▪ Gather data in a variety of ways to help in answering questions ▪ Use equipment accurately to improve the detail of their measurements/observations (e.g. <i>microscopes, measuring syringes, measuring cylinders, hand lenses</i>)	▪ <u>Record and present findings using simple scientific language and vocabulary from the year 3 PoS,</u> including discussions, oral and written explanations, notes, annotated drawings, pictorial representations, labelled diagrams, simple tables, bar charts (using scales chosen for them), displays or presentations ▪ With scaffold / support record, and present data in a variety of ways to help in answering questions. ▪ Communicate their findings in ways that are appropriate for different audiences. (linked to Y3 PoS)	▪ With scaffold/support, describe and compare the effect of different factors on something. (e.g. <i>we noticed that larger magnets are not always stronger</i>) ▪ <u>With help, look for changes and simple patterns in their observations, data, chart or graph.</u> ▪ Use their results to consider whether they met their predictions.	▪ Use their experience and some evidence or results to <u>draw a simple conclusion</u> to answer their original question. ▪ Write a simple explanation of why things happened (using the word 'because') and using simple scientific language and vocabulary from the year 3 PoS	▪ Say whether what happened was what they expected and notice any results that seem odd. ▪ <u>Begin to recognise when a test is not fair</u> and suggest improvements.
Year 2	▪ Carry out simple comparative tests as part of a group, following a method with some independence ▪ Make a simple prediction about what might happen and try to give a vague reason (even though it might not be correct) ▪ With support, make suggestions on a method for setting up a simple comparative test ▪ Talk about a practical way to find answers to their questions	▪ <u>Measure</u> using non-standard and simple standard measures (e.g. cm, time) with increasing accuracy ▪ Begin to make decisions about which equipment to use ▪ <u>Correctly and safely use equipment</u> provided to make observations and/or take simple measurements	▪ Record and communicate their findings in a range of ways to a variety of audiences ▪ Use simple scientific language with increasing accuracy (from year 2 PoS) ▪ <u>Record simple data with some accuracy to help in answering questions;</u> - With support or using frameworks, make decisions about how to complete a variety of tables/charts (e.g. <i>a 2 column table, tally charts, Venn diagram, pictograms, block graphs with 1:1 scale</i>). - Present findings in a class displays - Sequence / annotate photographs of change over time ▪ <i>Produced increasingly detailed drawings which are labelled/annotated</i>	▪ With guidance, begin to notice patterns in their data e.g. order their findings, sequence best to worst, say what happened over time, etc. ▪ Recognise if results matched predictions. (say if results were what they expected) ▪ Use their recordings to talk about and describe what has happened	▪ <u>Begin to use simple scientific language (from year 2 PoS) to explain what they have found out.</u> ▪ <u>Give a simple, logical reason why something happened (e.g. I think ... because ...)</u>	▪ <u>Begin to discuss if the test was unfair</u>
	PLANNING AND TESTING KS1 - performing simple tests LKS2 - making decisions about and setting up simple practical enquiries, comparative tests and fair tests	USING EQUIPMENT AND MEASURES KS1 - Using simple equipment and gathering data to help in answering their questions LKS2 - making accurate measurements and gathering data	COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp	CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION		
				DESCRIBING RESULTS / LOOKING FOR PATTERNS KS1 - Talk about what happened / what they noticed LKS2 - Describing their findings / results	EXPLAINING RESULTS KS1 - talk about what they found out LKS2 - reporting on findings saying why something happened	TRUSTING RESULTS KS1 – beginning to spot when a method is not fair LKS2 - suggest improvements for further tests

Year Group Expectations: Year 4

Year 5	- Use their developing scientific knowledge and understanding and relevant scientific language and terminology to discuss, communicate and explain their observations (incl. more abstract ideas from Y5 PoS (e.g. friction, air resistance, forces, Earth and space, reversible and irreversible changes). - Evaluate their observations and suggest a further test, offer another question or make a prediction - Observe (including changes over time) and suggest a reason for what they notice	<u>Suggest reasons for similarities and differences</u> - Compare and contrast things beyond their locality and use these similarities and differences to help to classify (e.g. <i>features of animals, life cycles of different living things, melting compared with dissolving, etc.</i>) - Use secondary sources of information to identify and classify. <u>Decide which sources of information (and/or equipment and/or test) to help identify and classify</u>	- Recognise scientific questions that do not yet have definitive answers. (linked to Y5 PoS) - Refine a scientific question so that it can be tested e.g. 'What would happen to... if we changed...?' - Decide whether their questions can be answered by researching or by testing <u>Independently ask their own scientific questions taking some ownership for finding out the answers</u>	<u>Find out how scientific ideas have changed/developed over time</u> (linked to Y5 PoS) <u>Articulate and explain findings from their research using scientific knowledge and understanding</u> (see 'Communicating' box below re vocabulary) - Make decisions about which information to use from a wide range of sources	Perform / create simple models to exemplify scientific ideas using scientific terminology where appropriate (e.g. <i>spheres to represent movements of the Sun and Earth, solar system models, shadow clocks, a simple lever or mechanism</i>).	- Propose their own ideas and make decisions with agreement in a group - Support, listen to and acknowledge others in the group e.g. Yes. I prefer that one too - Check the clarity of each other's suggestions e.g. are you saying you think this one is a herbivore? - Build on / add to someone else's idea to improve a plan or suggestion - Understand that it is okay to disagree with their peers and offer a reasons for their opinion
	- Suggest their own ideas on a concept and compare these with what they observe / find out. - Use observations to suggest what to do next <u>Discuss ideas and develop descriptions from their observations using relevant scientific language and vocabulary</u> (from Y4 PoS) <u>Observe and record relationships between structure and function or between different parts of a processes</u> (linked to Y4 PoS) <u>Observe and record changes /stages over time</u> (linked to Y4 PoS)	<u>Make a simple guide to local living things.</u> <u>Use guides or simple keys to classify / identify [animals, flowering plants and non-flowering plants].</u> - Use their observations to identify and classify <u>Begin to give reasons for these similarities and differences.</u> - Record similarities as well as differences and/or changes related to simple scientific ideas or processes or more complex groups of objects/living things/events (e.g. <i>evaporation and condensation, different food chains, different electrical circuits</i>)	<u>Ask/raise their own relevant questions with increasing confidence and independence that can be explored, observed, tested or investigated further</u> - Ask questions such as 'What will happen if...?' or 'What if we changed...?' (linked with Y4 PoS) <u>Choose/select a relevant question that can be answered [by research or experiment / test].</u>	<u>Make decisions about which information to use from a wide range of sources and make decisions about how to present their research</u> - Recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations.	- Make a visual representation or a model of something to represent something they have seen or a process that is difficult to see. - Suggest their own ideas on a concept and compare these with models or images.	- Make some decisions about an idea within a group (e.g. <i>I think we should find out by testing...</i>) - Increasingly support, listen to and acknowledge others in the group - Build on / add to someone else's idea to improve a plan. - Understand that it is okay to disagree with their peers and offer reasons for their opinion
	<u>Observe and record relationships between structure and function</u> (linked to Y3 PoS) - Observe and record changes /stages over time (linked to Y3 PoS) - Explore / observe things in the local environment / real contexts and record observations (linked to Y3 PoS) – see 'Communicating' section also re links to vocabulary	<u>Decide ways and give reasons for sorting, grouping, classifying, identifying things/objects, living things, processes or events based on specific characteristics</u> <u>Compare and contrast and begin to consider the relationships between different things</u> (e.g. <i>structures of plants, functions of plant parts, diets, skeletons of humans and other animals, changes over time, etc.</i>) - Record similarities as well as differences (e.g. <i>what do all skeletons have? as well as the differences between skeletons</i>)	- Explore their own ideas about 'what if...?' scenarios e.g. humans did not have skeletons. - Ask questions such as 'What if we tried...?' or 'What if we changed...?' <u>Begin to understand that some questions can be tested in the classroom and some cannot.</u> - Within a group suggest questions that can be explored, observed, tested or investigated further <u>Within a group suggest relevant questions about what they observe and about the world around them.</u>	<u>Find things out using a range of secondary sources of information</u> (e.g. <i>books, photographs, videos and other technology</i>)	Act out or make a model of something to represent something in the real world using appropriate scientific vocabulary verbally.	- Begin to make some decisions about an idea within a group from a list of choices (e.g. let's put them all in a pile first OR I think we should try) - With help; support, listen to and acknowledge others in the group (e.g. <i>Yes. I prefer that one too</i>) - Build on / add to someone else's idea. (e.g. <i>we could use x and as well as y</i>) - Begin to understand that it is okay to disagree with their peers and offer a reason for their opinion
	EXPLORING / OBSERVING UKS2 - developing a deeper understanding of a wide range of scientific ideas and encountering more abstract ideas LKS2 - developing their own ideas and their understanding of the world around them	GROUPING AND CLASSIFYING UKS2 - Compare and contrast a variety of examples linked to UKS2 PoS LKS2 - Compare and contrast a variety of examples linked to LKS2 PoS	QUESTIONING UKS2 - asking their own questions about scientific phenomena LKS2 - asking relevant questions	RESEARCH UKS2 - summarise research from a wide variety of sources and recognising that scientific ideas change and develop over time LKS2 - finding things out using a wide range of secondary sources of information	MODELLING using dance, drama or a visual aid to represent science in the real world	COLLABORATING interacting effectively as part of a group

Year Group Expectations: Year 4

Year 5	- Carry our fair tests and other investigations with increasing independence - Suggest more than one possible prediction and begin to suggest which is the most likely. Justify their reason with some knowledge and understanding of the scientific concept - Make decisions about which variables to change, measure and keep the same (linked to the appropriate units in the Y5 PoS) - Make most of the planning decisions for an investigation. - Recognise when it is appropriate to carry out a fair test.	- Make their own decisions about what <u>observations to make or measurements to use and how long to take them for</u> (recognising the need for repeat readings on some occasions). - Take measurements using a range of scientific equipment with increasing accuracy and using more complex scales / units - Identify possible risks to themselves and others and suggest ways of reducing these - Choose the most appropriate equipment and make accurate measurements	- Use their developing scientific knowledge and understanding and relevant scientific language and terminology to communicate more abstract concepts (linked to Y5 PoS) - Present and explain their findings through talk, in written forms or in other ways (e.g. using technology) for a range of audiences / purposes - Record data and results of increasing complexity using different formats e.g. tables, annotated scientific diagrams, classification keys, graphs and models - Make decisions about the most appropriate way of recording data	- Describe straightforward patterns in results linking cause and effect e.g. using er...er or the word 'more' (e.g. the longer, thinner shapes move through the water <u>more</u> quickly OR the larger the wings, the longer it takes the spinner to fall) - Look for / notice relationships between things and begin to describe these. - Comment on the results and whether they support the initial prediction	- Use their scientific K&U and appropriate scientific language and terminology (linked to Y5 PoS) to explain their findings and data and answer their initial question - Draw a valid conclusion (explain why it happened) based on their data and observations (from Y5 PoS)	- Begin to recognise how repeated readings improve the reliability of results - Compare results with others and comment on how reliable they are
Year 4	- Carry out simple fair tests with increasing confidence investigating the effect of something on something else (linked to Y4 PoS). - Start to make their own decisions about the most appropriate type of science enquiry they might use to answer scientific questions (is a fair test the best way to investigate their question?). - Make a prediction based on the knowledge acquired from previous explorations / observations and apply it to a new situation - Explain their planning decisions and choices - Make some of the planning decisions about what to change and measure/observe. - Begin to recognise when a fair test is necessary.	- Begin to identify where patterns might be found and use this to <u>begin to identify what data to collect</u> - Make more of the decisions about what observations to make, how long to make them for and the type of equipment that might be used. - Recognise obvious risks and how to keep themselves and others safe - Learn how to use new equipment, such as <u>data loggers & measure temperature in degrees Celsius (°C) using a thermometer.</u> - Collect data from their own observations and measurements, using notes/simple tables/standard units - Make accurate measurements using <u>standard units</u> (and more complex units and parts of units) using a range of equipment and scales	- Record findings using relevant scientific language and vocabulary (from Y4 PoS), including discussions, oral and written explanations, notes, drawings (annotated), pictorial representations, labelled diagrams, tables and bar charts (where intervals and ranges agreed through discussion), displays or presentations - Begin to select the most useful ways to collect, record, classify and present data from a range of choices - Make decisions on how best to communicate their findings in ways that are appropriate for different audiences	- Notice/find patterns in their observations and data. (Describe the effect of something on something else) (e.g. as I lengthen the ruler I notice that the pitch gets lower) - With some independence, analyse results / observations by writing a sentence that matches the evidence - i.e. deciding the important aspect of the result and summarising in a conclusion (e.g. metals tend to be good conductors of electricity)	- Begin to develop their ideas about relationships and interactions between things and explain them - Use relevant scientific language and vocabulary (from Y4 PoS) to begin to say/explain why something happened	- Use results to suggest improvements, new questions and/or predictions for setting up further tests - Compare their results with others and give reasons why results might be different
Year 3	- Help to decide about how to set up a simple fair test and begin to recognise when a test is not fair. - Make a prediction based on everyday experience - With support/as a group, set up simple practical enquiries incl. comparative and fair tests e.g. make a choice from a list of a things (variables) to change when conducting a fair test. (e.g. choose which magnets to compare and which method to use to test their strength). - As a group, begin to make some decisions about the best way of answering their qus. - Find/suggest a practical way to compare things e.g. rocks, magnets	- Collect data from their own observations and measurements using notes/ simple tables/standard units - Help to make some decisions about what observations to make, how long to make them for, the type of simple equipment that might be used and how to work safely. - Make simple accurate measurements using whole number standard units, using a range of equipment - Gather data in a variety of ways to help in answering questions - Use equipment accurately to improve the detail of their measurements/observations (e.g. microscopes, measuring syringes, measuring cylinders, hand lenses)	- Record and present findings using simple scientific language and vocabulary from the year 3 PoS, including discussions, oral and written explanations, notes, annotated drawings, pictorial representations, labelled diagrams, simple tables, bar charts (using scales chosen for them), displays or presentations - With scaffold / support record, and present data in a variety of ways to help in answering questions. - Communicate their findings in ways that are appropriate for different audiences. (linked to Y3 PoS)	- With scaffold/support, describe and compare the effect of different factors on something. (e.g. we noticed that larger magnets are not always stronger) - With help, look for changes and simple patterns in their observations, data, chart or graph. - Use their results to consider whether they met their predictions.	- Use their experience and some evidence or results to draw a simple conclusion to answer their original question. - Write a simple explanation of why things happened (using the word 'because') and using simple scientific language and vocabulary from the year 3 PoS	- Say whether what happened was what they expected and notice any results that seem odd. - Begin to recognise when a test is not fair and suggest improvements.
	PLANNING AND TESTING UKS2 - using different types of scientific enquiry making decisions about and explaining choices for testing LKS2 - making decisions about and setting up simple practical enquiries, comparative tests and fair tests	USING EQUIPMENT AND MEASURES UKS2 - increasing complexity and increasing accuracy and precision make their own decisions about the data to collect LKS2 - making accurate measurements and gathering data	COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp	CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION DESCRIBING RESULTS / LOOKING FOR PATTERNS UKS2 - Looking for patterns analysing functions, relationships and interactions more systematically LKS2 - Describing their findings/ results EXPLAINING RESULTS UKS2 - draw conclusions based on / supported by evidence LKS2 - reporting on findings saying why something happened TRUSTING RESULTS UKS2 - comment on how reliable the data is LKS2 - suggest improvements for further tests		

Year Group Expectations: Year 5

	Year 6	- Use correct scientific knowledge and understanding and relevant scientific language to discuss their observations and explorations (linked to Y6 PoS) - Identify changes that have occurred over a very long period of time (evolution) and discuss how changes have impacted the world - Explore more abstract systems / functions / changes / behaviours and record their understanding of these (e.g. the relationship between diet, exercise, drugs, lifestyle and health; evolutionary changes; how light travels)	- Recognise the importance of classification to the scientific world and form a conclusion from their sorting and classifying - Compare and contrast more complex processes, systems, functions (e.g. sexual and asexual reproduction) - Construct a classification key / branching database using more than two items - Compare and contrast things beyond their locality and discuss advantages/disadvantages, pros/cons of the similarities and differences - Use research* to identify and classify things - Use classification systems, keys and other information records [databases] to help classify or identify things.	- Recognise scientific questions that do not yet have definitive answers (linked to Y6 PoS) - Refine a scientific question to make it testable i.e. Ask a testable question which includes the change and measure variables - e.g. what would happen to ... if we changed ...? e.g. What affect would we have on ... if we ...? e.g. How would exercise affect the pulse rate? - Use observations to suggest a further (testable or research) question. - Independently ask a variety of scientific questions and decide the type of enquiry needed to answer them	- Research how scientific ideas have developed over time and had an impact on our lives. - Use evidence from a variety of sources to justify their ideas - Recognise which secondary sources will be most useful to research their ideas and begin to separate opinion from fact. - Interview people to find out information	Make / perform and use their own versions of simple models to describe and explain scientific ideas (e.g. circulatory system drama, periscopes to explain how light travels, burglar alarm to explain components in a circuit)	- Propose their own ideas and make decisions with agreement in a group - Support, listen to and acknowledge others in the group - Check the clarity of each other's suggestions - Build on / add to someone else's idea to improve a plan or suggestion - Understand that it is okay to disagree with their peers and offer a reasons for their opinion
		- Use their developing scientific knowledge and understanding and relevant scientific language and terminology to discuss, communicate and explain their observations (incl. more abstract ideas from Y5 PoS (e.g. friction, air resistance, forces, Earth and space, reversible and irreversible changes). - Evaluate their observations and suggest a further test, offer another question or make a prediction - Observe (including changes over time) and suggest a reason for what they notice	- Suggest reasons for similarities and differences - Compare and contrast things beyond their locality and use these similarities and differences to help to classify (e.g. features of animals, life cycles of different living things, melting compared with dissolving, etc). - Use secondary sources of information to identify and classify. - Decide which sources of information (and/or equipment and/or test) to help identify and classify.	- Recognise scientific questions that do not yet have definitive answers. (linked to Y5 PoS) - Refine a scientific question so that it can be tested e.g. 'What would happen to... if we changed...?' - Decide whether their questions can be answered by researching or by testing - Independently ask their own scientific questions taking some ownership for finding out the answers	- Find out how scientific ideas have changed/developed over time (linked to Y5 PoS) - Articulate and explain findings from their research using scientific knowledge and understanding (see 'Communicating' box below re vocabulary) - Make decisions about which information to use from a wide range of sources	Perform / create simple models to exemplify scientific ideas using scientific terminology where appropriate (e.g. spheres to represent movements of the Sun and Earth, solar system models, shadow clocks, a simple lever or mechanism).	- Propose their own ideas and make decisions with agreement in a group - Support, listen to and acknowledge others in the group e.g. Yes. I prefer that one too - Check the clarity of each other's suggestions e.g. are you saying you think this one is a herbivore? - Build on / add to someone else's idea to improve a plan or suggestion - Understand that it is okay to disagree with their peers and offer a reasons for their opinion
		- Suggest their own ideas on a concept and compare these with what they observe / find out. - Use observations to suggest what to do next - Discuss ideas and develop descriptions from their observations using relevant scientific language and vocabulary (from Y4 PoS) - Observe and record relationships between structure and function or between different parts of a processes (linked to Y4 PoS) - Observe and record changes /stages over time (linked to Y4 PoS)	- Make a simple guide to local living things. - Use guides or simple keys to classify / identify [animals, flowering plants and non-flowering plants]. - Use their observations to identify and classify - Begin to give reasons for these similarities and differences. - Record similarities as well as differences and/or changes related to simple scientific ideas or processes or more complex groups of objects/living things/events (e.g. evaporation and condensation, different food chains, different electrical circuits)	- Ask/raise their own relevant questions with increasing confidence and independence that can be explored, observed, tested or investigated further - Ask questions such as 'What will happen if...?' or 'What if we changed...?' (linked with Y4 PoS) - Choose/select a relevant question that can be answered [by research or experiment / test].	- Make decisions about which information to use from a wide range of sources and make decisions about how to present their research - Recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations.	- Make a visual representation or a model of something to represent something they have seen or a process that is difficult to see. - Suggest their own ideas on a concept and compare these with models or images.	- Make some decisions about an idea within a group (e.g. I think we should find out by testing...) - Increasingly support, listen to and acknowledge others in the group - Build on / add to someone else's idea to improve a plan. - Understand that it is okay to disagree with their peers and offer reasons for their opinion
		EXPLORING / OBSERVING UKS2 - developing a deeper understanding of a wide range of scientific ideas and encountering more abstract ideas LKS2 - developing their own ideas and their understanding of the world around them	GROUPING AND CLASSIFYING UKS2 - Compare and contrast a variety of examples linked to UKS2 PoS LKS2 - Compare and contrast a variety of examples linked to LKS2 PoS	QUESTIONING UKS2 - asking their own questions about scientific phenomena LKS2 - asking relevant questions	RESEARCH UKS2 - summarise research from a wide variety of sources and recognising that scientific ideas change and develop over time LKS2 - finding things out using a wide range of secondary sources of information	MODELLING using dance, drama or a visual aid to represent science in the real world	COLLABORATING interacting effectively as part of a group

Year Group Expectations: Year 5

Year 6	- Predict what a graph might look like before collecting results - Make a hypothesis where they say how one thing will affect another and give a reason for their suggestion with a developing understanding of the scientific concept <u>Identify variables to change, measure and keep the same in order for a test to be fair</u> - Independently plan investigations and explain planning decisions - Decide when it is appropriate to carry out a fair test investigation, comparative test or alternative	<u>Decide whether to repeat any readings and justify the reason for doing so</u> <u>Make their own decisions about what measurements to take (and begin to identify the ranges used).</u> - Make, and act on, suggestions to control/reduce risks to themselves & others <u>Use equipment fit for purpose to take measurements which are increasingly accurate and precise</u> - Decide the most appropriate equipment to use to collect data	<u>Articulate understanding of the concept using scientific language and terminology when describing abstract ideas, observations and findings (linked to the Y6 PoS)</u> - Record data and results of increasing complexity using scientific diagrams and labels, recognised symbols, classification keys, tables, bar and line graphs, and models. - Make decisions about how to present and explain their findings through talk, in written forms or in other ways (e.g. using technology)	- Spot unexpected results that do not fit the pattern (anomalies) <u>Identify patterns in results collected and describe them using the change and measure variables (causal relationships) (e.g. as we increased the number of batteries the brightness the bulb increased</u>	- Identify evidence that refutes or supports their ideas <u>Independently form a conclusion which draws on the evidence from the test (linked to Y6 PoS)</u> <u>Use scientific language and terminology (linked to Y6 PoS) to explain why something happened</u>	- Be able to suggest reasons for unexpected results (anomalies) <u>Describe how to improve planning to produce more reliable results</u> - Say how confident they are that their results are reliable and give a reason
Year 5	- Carry our fair tests and other investigations with increasing independence - Suggest more than one possible prediction and begin to suggest which is the most likely. Justify their reason with some knowledge and understanding of the scientific concept <u>Make decisions about which variables to change, measure and keep the same (linked to the appropriate units in the Y5 PoS)</u> - Make most of the planning decisions for an investigation. - Recognise when it is appropriate to carry out a fair test.	<u>Make their own decisions about what observations to make or measurements to use and how long to take them for (recognising the need for repeat readings on some occasions).</u> - Take measurements using a range of scientific equipment with increasing accuracy and using more complex scales / units - Identify possible risks to themselves and others and suggest ways of reducing these - Choose the most appropriate equipment and make accurate measurements	<u>Use their developing scientific knowledge and understanding and relevant scientific language and terminology to communicate more abstract concepts (linked to Y5 PoS)</u> <u>Present and explain their findings through talk, in written forms or in other ways (e.g. using technology) for a range of audiences / purposes</u> <u>Record data and results of increasing complexity using different formats e.g. tables, annotated scientific diagrams, classification keys, graphs and models</u> - Make decisions about the most appropriate way of recording data	<u>Describe straightforward patterns in results linking cause and effect e.g. using er...er or the word 'more' (e.g. the longer, thinner shapes move through the water more quickly OR the larger the wings, the longer it takes the spinner to fall)</u> - Look for / notice relationships between things and begin to describe these. <u>Comment on the results and whether they support the initial prediction</u>	<u>Use their scientific K&U and appropriate scientific language and terminology (linked to Y5 PoS) to explain their findings and data and answer their initial question</u> <u>Draw a valid conclusion (explain why it happened) based on their data and observations (from Y5 PoS)</u>	<u>Begin to recognise how repeated readings improve the reliability of results</u> <u>Compare results with others and comment on how reliable they are</u>
Year 4	<u>Carry out simple fair tests with increasing confidence</u> investigating the effect of something on something else (linked to Y4 PoS). <u>Start to make their own decisions about the most appropriate type of science enquiry they might use to answer scientific questions (is a fair test the best way to investigate their question?).</u> - Make a prediction based on the knowledge acquired from previous explorations / observations and apply it to a new situation <u>Explain their planning decisions and choices</u> <u>Make some of the planning decisions about what to change and measure/observe.</u> - Begin to recognise when a fair test is necessary.	- Begin to identify where patterns might be found and use this to <u>begin to identify what data to collect</u> <u>Make more of the decisions</u> about what observations to make, how long to make them for and the type of equipment that might be used. - Recognise obvious risks and how to keep themselves and others safe - Learn how to use new equipment, such as <u>data loggers & measure temperature in degrees Celsius (°C) using a thermometer.</u> <u>Collect data from their own observations and measurements, using notes/simple tables/standard units</u> <u>Make accurate measurements using standard units (and more complex units and parts of units) using a range of equipment and scales</u>	<u>Record findings using relevant scientific language and vocabulary (from Y4 PoS), including discussions, oral and written explanations, notes, drawings (annotated), pictorial representations, labelled diagrams, tables and bar charts (where intervals and ranges agreed through discussion), displays or presentations</u> <u>Begin to select the most useful ways to collect, record, classify and present data from a range of choices</u> - Make decisions on how best to communicate their findings in ways that are appropriate for different audiences	<u>Notice/find patterns in their observations and data. (Describe the effect of something on something else) (e.g. as I lengthen the ruler I notice that the pitch gets lower)</u> - With some independence, analyse results / observations by writing a sentence that matches the evidence - i.e. deciding the important aspect of the result and summarising in a conclusion (e.g. <i>metals tend to be good conductors of electricity</i>)	- Begin to develop their ideas about relationships and interactions between things and explain them <u>Use relevant scientific language and vocabulary (from Y4 PoS) to begin to say/explain why something happened</u>	<u>Use results to suggest improvements, new questions and/or predictions for setting up further tests</u> - Compare their results with others and give reasons why results might be different
	PLANNING AND TESTING UKS2 - using different types of scientific enquiry making decisions about and explaining choices for testing LKS2 - making decisions about and setting up simple practical enquiries, comparative tests and fair tests	USING EQUIPMENT AND MEASURES UKS2 - increasing complexity and increasing accuracy and precision make their own decisions about the data to collect LKS2 - making accurate measurements and gathering data	COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp	CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION DESCRIBING RESULTS / LOOKING FOR PATTERNS UKS2 - Looking for patterns analysing functions, relationships and interactions more systematically LKS2 - Describing their findings/ results	EXPLAINING RESULTS UKS2 - draw conclusions based on / supported by evidence LKS2 - reporting on findings saying why something happened	TRUSTING RESULTS UKS2 - comment on how reliable the data is LKS2 - suggest improvements for further tests

Year Group Expectations: Year 6

Year 6	- Use correct scientific knowledge and understanding and relevant scientific language to discuss their observations and explorations (linked to Y6 PoS) - Identify changes that have occurred over a very long period of time (evolution) and discuss how changes have impacted the world - Explore more abstract systems / functions / changes / behaviours and record their understanding of these (e.g. the relationship between diet, exercise, drugs, lifestyle and health; evolutionary changes; how light travels)	- Recognise the importance of classification to the scientific world and form a conclusion from their sorting and classifying - Compare and contrast more complex processes, systems, functions (e.g. sexual and asexual reproduction) - Construct a classification key / branching database using more than two items - Compare and contrast things beyond their locality and discuss advantages/disadvantages, pros/cons of the similarities and differences - Use research* to identify and classify things - Use classification systems, keys and other information records [databases] to help classify or identify things.	- Recognise scientific questions that do not yet have definitive answers (linked to Y6 PoS) - Refine a scientific question to make it testable i.e. Ask a testable question which includes the change and measure variables - e.g. what would happen to ... if we changed ...? e.g. What affect would we have on ... if we ...? e.g. How would exercise affect the pulse rate? - Use observations to suggest a further (testable or research) question. - Independently ask a variety of scientific questions and decide the type of enquiry needed to answer them	- Research how scientific ideas have developed over time and had an impact on our lives. - Use evidence from a variety of sources to justify their ideas - Recognise which secondary sources will be most useful to research their ideas and begin to separate opinion from fact. - Interview people to find out information	Make / perform and use their own versions of simple models to describe and explain scientific ideas (e.g. circulatory system drama, periscopes to explain how light travels, burglar alarm to explain components in a circuit)	- Propose their own ideas and make decisions with agreement in a group - Support, listen to and acknowledge others in the group - Check the clarity of each other's suggestions - Build on / add to someone else's idea to improve a plan or suggestion - Understand that it is okay to disagree with their peers and offer a reasons for their opinion
Year 5	- Use their developing scientific knowledge and understanding and relevant scientific language and terminology to discuss, communicate and explain their observations (incl. more abstract ideas from Y5 PoS (e.g. friction, air resistance, forces, Earth and space, reversible and irreversible changes). - Evaluate their observations and suggest a further test, offer another question or make a prediction - Observe (including changes over time) and suggest a reason for what they notice	- Suggest reasons for similarities and differences - Compare and contrast things beyond their locality and use these similarities and differences to help to classify (e.g. features of animals, life cycles of different living things, melting compared with dissolving, etc). - Use secondary sources of information to identify and classify. - Decide which sources of information (and/or equipment and/or test) to help identify and classify	- Recognise scientific questions that do not yet have definitive answers. (linked to Y5 PoS) - Refine a scientific question so that it can be tested e.g. 'What would happen to... if we changed...?' - Decide whether their questions can be answered by researching or by testing - Independently ask their own scientific questions taking some ownership for finding out the answers	- Find out how scientific ideas have changed/developed over time (linked to Y5 PoS) - Articulate and explain findings from their research using scientific knowledge and understanding (see 'Communicating' box below re vocabulary) - Make decisions about which information to use from a wide range of sources	Perform / create simple models to exemplify scientific ideas using scientific terminology where appropriate (e.g. spheres to represent movements of the Sun and Earth, solar system models, shadow clocks, a simple lever or mechanism).	- Propose their own ideas and make decisions with agreement in a group - Support, listen to and acknowledge others in the group e.g. Yes. I prefer that one too - Check the clarity of each other's suggestions e.g. are you saying you think this one is a herbivore? - Build on / add to someone else's idea to improve a plan or suggestion - Understand that it is okay to disagree with their peers and offer a reasons for their opinion
Year 4	- Suggest their own ideas on a concept and compare these with what they observe / find out. - Use observations to suggest what to do next - Discuss ideas and develop descriptions from their observations using relevant scientific language and vocabulary (from Y4 PoS) - Observe and record relationships between structure and function or between different parts of a processes (linked to Y4 PoS) - Observe and record changes /stages over time (linked to Y4 PoS)	- Make a simple guide to local living things. - Use guides or simple keys to classify / identify [animals, flowering plants and non-flowering plants]. - Use their observations to identify and classify - Begin to give reasons for these similarities and differences. - Record similarities as well as differences and/or changes related to simple scientific ideas or processes or more complex groups of objects/living things/events (e.g. evaporation and condensation, different food chains, different electrical circuits)	- Ask/raise their own relevant questions with increasing confidence and independence that can be explored, observed, tested or investigated further - Ask questions such as 'What will happen if...?' or 'What if we changed...?' (linked with Y4 PoS) - Choose/select a relevant question that can be answered [by research or experiment / test].	- Make decisions about which information to use from a wide range of sources and make decisions about how to present their research - Recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations.	- Make a visual representation or a model of something to represent something they have seen or a process that is difficult to see. - Suggest their own ideas on a concept and compare these with models or images.	- Make some decisions about an idea within a group (e.g. I think we should find out by testing...) - Increasingly support, listen to and acknowledge others in the group - Build on / add to someone else's idea to improve a plan. - Understand that it is okay to disagree with their peers and offer reasons for their opinion
	EXPLORING / OBSERVING UKS2 - developing a deeper understanding of a wide range of scientific ideas and encountering more abstract ideas LKS2 - developing their own ideas and their understanding of the world around them	GROUPING AND CLASSIFYING UKS2 - Compare and contrast a variety of examples linked to UKS2 PoS LKS2 - Compare and contrast a variety of examples linked to LKS2 PoS	QUESTIONING UKS2 - asking their own questions about scientific phenomena LKS2 - asking relevant questions	RESEARCH UKS2 - summarise research from a wide variety of sources and recognising that scientific ideas change and develop over time LKS2 - finding things out using a wide range of secondary sources of information	MODELLING using dance, drama or a visual aid to represent science in the real world	COLLABORATING interacting effectively as part of a group

Year Group Expectations: Year 6

Year 6	- Predict what a graph might look like before collecting results - Make a hypothesis where they say how one thing will affect another and give a reason for their suggestion with a developing understanding of the scientific concept - Identify variables to change, measure and keep the same in order for a test to be fair - Independently plan investigations and explain planning decisions - Decide when it is appropriate to carry out a fair test investigation, comparative test or alternative	- Decide whether to repeat any readings and justify the reason for doing so - Make their own decisions about what measurements to take (and begin to identify the ranges used). - Make, and act on, suggestions to control/reduce risks to themselves & others - Use equipment fit for purpose to take measurements which are increasingly accurate and precise - Decide the most appropriate equipment to use to collect data	- Articulate understanding of the concept using scientific language and terminology when describing abstract ideas, observations and findings (linked to the Y6 PoS) - Record data and results of increasing complexity using scientific diagrams and labels, recognised symbols, classification keys, tables, bar and line graphs, and models. - Make decisions about how to present and explain their findings through talk, in written forms or in other ways (e.g. using technology)	- Spot unexpected results that do not fit the pattern (anomalies) - Identify patterns in results collected and describe them using the change and measure variables (causal relationships) (e.g. as we <i>increased the number of batteries</i> the <i>brightness the bulb increased</i>)	- Identify evidence that refutes or supports their ideas - Independently form a conclusion which draws on the evidence from the test (linked to Y6 PoS) - Use scientific language and terminology (linked to Y6 PoS) to explain why something happened	- Be able to suggest reasons for unexpected results (anomalies) - Describe how to improve planning to produce more reliable results - Say how confident they are that their results are reliable and give a reason
	- Carry our fair tests and other investigations with increasing independence - Suggest more than one possible prediction and begin to suggest which is the most likely. Justify their reason with some knowledge and understanding of the scientific concept - Make decisions about which variables to change, measure and keep the same (linked to the appropriate units in the Y5 PoS) - Make most of the planning decisions for an investigation. - Recognise when it is appropriate to carry out a fair test.	- Make their own decisions about what observations to make or measurements to use and how long to take them for (recognising the need for repeat readings on some occasions). - Take measurements using a range of scientific equipment with increasing accuracy and using more complex scales / units - Identify possible risks to themselves and others and suggest ways of reducing these - Choose the most appropriate equipment and make accurate measurements	- Use their developing scientific knowledge and understanding and relevant scientific language and terminology to communicate more abstract concepts (linked to Y5 PoS) - Present and explain their findings through talk, in written forms or in other ways (e.g. using technology) for a range of audiences / purposes - Record data and results of increasing complexity using different formats e.g. tables, annotated scientific diagrams, classification keys, graphs and models - Make decisions about the most appropriate way of recording data	- Describe straightforward patterns in results linking cause and effect e.g. using <i>er...er</i> or the word 'more' (e.g. <i>the longer, thinner shapes move through the water more quickly OR the larger the wings, the longer it takes the spinner to fall</i>) - Look for / notice relationships between things and begin to describe these. - Comment on the results and whether they support the initial prediction	- Use their scientific K&U and appropriate scientific language and terminology (linked to Y5 PoS) to explain their findings and data and answer their initial question - Draw a valid conclusion (explain why it happened) based on their data and observations (from Y5 PoS)	- Begin to recognise how repeated readings improve the reliability of results - Compare results with others and comment on how reliable they are
	- Carry out simple fair tests with increasing confidence investigating the effect of something on something else (linked to Y4 PoS). - Start to make their own decisions about the most appropriate type of science enquiry they might use to answer scientific questions (is a fair test the best way to investigate their question?). - Make a prediction based on the knowledge acquired from previous explorations / observations and apply it to a new situation - Explain their planning decisions and choices - Make some of the planning decisions about what to change and measure/observe. - Begin to recognise when a fair test is necessary.	- Begin to identify where patterns might be found and use this to begin to identify what data to collect - Make more of the decisions about what observations to make, how long to make them for and the type of equipment that might be used. - Recognise obvious risks and how to keep themselves and others safe - Learn how to use new equipment, such as data loggers & measure temperature in degrees Celsius (°C) using a thermometer. - Collect data from their own observations and measurements, using notes/simple tables/standard units - Make accurate measurements using standard units (and more complex units and parts of units) using a range of equipment and scales	- Record findings using relevant scientific language and vocabulary (from Y4 PoS), including discussions, oral and written explanations, notes, drawings (annotated), pictorial representations, labelled diagrams, tables and bar charts (where intervals and ranges agreed through discussion), displays or presentations - Begin to select the most useful ways to collect, record, classify and present data from a range of choices - Make decisions on how best to communicate their findings in ways that are appropriate for different audiences	- Notice/find patterns in their observations and data. (Describe the effect of something on something else) (e.g. as I lengthen the ruler I notice that the pitch gets lower) - With some independence, analyse results / observations by writing a sentence that matches the evidence - i.e. deciding the important aspect of the result and summarising in a conclusion (e.g. <i>metals tend to be good conductors of electricity</i>)	- Begin to develop their ideas about relationships and interactions between things and explain them - Use relevant scientific language and vocabulary (from Y4 PoS) to begin to say/explain why something happened	- Use results to suggest improvements, new questions and/or predictions for setting up further tests - Compare their results with others and give reasons why results might be different
	PLANNING AND TESTING UKS2 - using different types of scientific enquiry making decisions about and explaining choices for testing LKS2 - making decisions about and setting up simple practical enquiries, comparative tests and fair tests	USING EQUIPMENT AND MEASURES UKS2 - increasing complexity and increasing accuracy and precision make their own decisions about the data to collect LKS2 - making accurate measurements and gathering data	COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp	CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION		
				DESCRIBING RESULTS / LOOKING FOR PATTERNS UKS2 - Looking for patterns analysing functions, relationships and interactions more systematically LKS2 - Describing their findings/ results	EXPLAINING RESULTS UKS2 - draw conclusions based on / supported by evidence LKS2 - reporting on findings saying why something happened	TRUSTING RESULTS UKS2 - comment on how reliable the data is LKS2 - suggest improvements for further tests
